

ALEX CHEVRIER

Software Engineer | Distributed Systems & Kafka Infrastructure
Hong Kong | +852 55189053 | chevrier.alex@gmail.com |
linkedin.com/in/alex-chevrier-323365b4 | github.com/alchevrier

TECHNICAL SKILLS

Languages: Java, Kotlin, TypeScript, SQL | Frameworks: Spring Boot, Spring Kafka, React.js | Distributed Systems: Kafka, Message Queues, Binary Protocols | Tools: Docker, Kubernetes, AWS, Spock, JUnit

WORK EXPERIENCE

Morgan Stanley, Hong Kong | Data Service Application Developer (Contract) Nov 2025 - Present

- Designed and delivered a greenfield messaging service by reverse-engineering undocumented Python batch system and implementing streaming architecture using Spring Kafka, Spring Boot 4, and Java 25. Independently implemented TCP over SOAP integration with ADR-driven design approach.
- Manage production Kafka cluster connecting isolated data centers across regions. Handle schema evolution, connector operations, and cross-region data synchronization.

We+, Hong Kong | Java Developer Sept 2023 - Nov 2025

- Filled operational documentation gaps for 21+ microservices: documented host configurations, marketplace product usage, and deployment procedures. Eliminated dependency on external team for environment setup.
- Contributed to Java 21 migration across multiple production applications.

LandyTech, London/Remote | Software Engineer Oct 2019 - Aug 2023

- Led front-end engineering team for Sesame back-office application. Architected monolith-to-microservices migration, introduced NX mono-repo, and automated risk data pipeline.

Redbite Solutions, Cambridge, UK | Software Engineer Nov 2016 - Oct 2019

- Engineered cloud asset management platform. Introduced Kotlin and reactive programming with Project Reactor.

PROJECTS

Mini-Kafka | github.com/alchevrier/distributed-messaging

Built Kafka-like distributed log storage from scratch (append-only logs, binary protocol, partitioning with MurmurHash3). ADR-driven design, >50% test coverage, Java 25.

EDUCATION

ENSEIRB-MATMECA, Bordeaux, France | Master's Degree and Bachelor in Computer Science
2013 - 2016
